### ***Claim Objections***

Claim 5 recite the limitations "the slopping slot" and "the triangular mounting".

There is insufficient antecedent basis for these limitations in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 513,246 to Parliaman.

In reference to claim 1, Parliaman discloses an inclination adjusting means, comprising:

- a bedplate 1,
- a backrest (2,2a) provided with a sliding slot thereon (2b), and
- a supporting rod 3 with one end thereof pivotally connected to the bedplate and the other end slidably passing through the sliding slot, wherein the angle of the backrest relative to the bedplate can be adjusted by moving the supporting rod between at least two different positions in the sliding slot. With regards to the Applicant's recitation "for the backrest of a bassinet" it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations.

*Ex parte Masham*, 2 USPQ2d 1647 (1987).

***Allowable Subject Matter***

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
